

Operating and Cleaning Instructions for Refrigerator

TEMPERATURE CONTROL

Temperature control should be set to maintain a temperature of 38°F (3.3°C) to 40°F (4.4°C). Cabinet temperature dropping below 38°F can cause improper operation or possible damage to the compressor.

CLEANING

Please remove all items from refrigerator at the end of your event. Wipe up any food or beverage spills with paper toweling or clean linens (provided). Final cleaning/sanitation of the refrigerator will be done by the St. Paul Student Center staff.

A fee of \$22.00 per hour will be charged to your event if extra cleanup is required.

Thank You
